Summary

Full Stack Developer specializing in the MERN Stack with hands-on experience building scalable web applications, RESTful APIs, authentication systems, payment integrations, and responsive user interfaces. Proficient in React.js, Node.js, Express.js, MongoDB, JavaScript, and modern frontend technologies. Passionate about solving real-world problems through technology and continuously improving development skills.

Technical Skills

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Redux, TypeScript, Bootstrap, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Database: MongoDB, MySQL

Tools: Git, GitHub, Axios, Postman, VS Code, Version Control

Deployment: Netlify, Vercel, Render

Experience

Frontend Web Developer Intern

Jan 2025 – Mar 2025

Onleed Media (Digital Marketing Agency)

- Built reusable React components for forms, layouts, and UI sections, improving consistency and maintainability across projects.
- Developed responsive user interfaces using React.js, and Bootstrap for client-facing marketing websites.
- Worked with designers and developers to deliver multiple marketing websites within given timelines.
- Used Git and GitHub for version control, managing feature updates and bug fixes in a team environment.

Projects

Quick Buy | MERN Stack | Live Demo | GitHub Repo

- A full stack e-commerce web application with user authentication, product browsing, cart management, and order processing features.
- Built secure authentication, product management, cart functionality, order tracking, and Razorpay payment integration for an e-commerce platform
- Designed responsive user interfaces using React, enabling dynamic product display and real-time cart updates.
- Implemented secure authentication and protected routes using JWT-based authorization with MongoDB for persistent data storage.

Futuride | MERN Stack | Live Demo | GitHub Repo

- Created a full-stack career guidance website using React.js for the frontend and Express.js with MongoDB for backend data storage.
- Built REST API endpoints to store and fetch quiz data and calculate user results.
- Used Bootstrap CSS and basic animations to make the website responsive and user-friendly.
- Deployed the backend using MongoDB Atlas and ensured production-ready performance.

Safa Tours | MERN Stack | Live Demo | GitHub Repo

- Built a travel booking website to collect customer inquiries through online forms.
- Established a Node.js + Express backend using Nodemailer to automate booking emails and send instant confirmations.
- Created reusable React components to keep the frontend clean and easy to manage.
- Designed responsive pages to improve form submission and user experience.
